Subject: **Ptolemaida Battery Energy Storage System – Candidate for the 2nd List of Projects of Common/Mutual Interest**

Pages: **2**

Dear Commissioner Mr. Dan Jørgensen,

Dear Director General Ms Ditte Juul Jørgensen,

We hereby send you the present Letter of Support in relation to the project Ptolemaida Battery Energy Storage System which is being promoted by the 3rd party project promoter "Ptolemaida Storage SMSA" (Member of the Eunice Energy Group). The Ptolemaida Battery Energy Storage System project is currently a candidate for the 2nd PCI/PMI List.

The project concerns a state-of-the-art Battery Energy Storage System plant located in northern Greece with a rated power of 250 MW and a storage capacity equal to 1000 MWh.

This Battery Energy Storage System fully complies with the Regulation (EU) 2022/869 PCI/PMI selection criteria, is fully aligned with NECP's and EU's Green Deal objectives, and will contribute to the market integration, sustainability and security of supply of Greece.

The Regulatory Authority for Energy, Waste and Water (RAAEY) fully supports the project and its objectives.

We hereby notify the present Letter of Support to the project promoter, so that it can be submitted to DG-ENERGY as part of its application for the inclusion of the Ptolemaida Battery Energy Storage System in the 2nd list of PCI/PMI projects.

Sincerely yours,

**The Vice President of the
Energy Sector of RAAEY**

Dimitrios Furlaris
